10 Non-resonant intense laser field effect on the nonlinear optical properties associated to the inter- and intra-band transitions in an anharmonic quantum well submitted to electric and magnetic field

Turkoglu, A; Aghoutane, N; (...); Ungan, F

Aug 2021 | May 2021 (Early Access) | SOLID STATE COMMUNICATIONS 334

Enriched Cited References

Simultaneous effects of electric, magnetic, and non-resonant intense laser field on the nonlinear optical properties of a GaAs quantum well with an anharmonic confinement potential profile are theoretically investigat ... Show more

11 The effect of impurity position and doping concentration on the binding energies and total optical absorption coefficients in a delta-doped quantum well

Durmuslar, AS; Turkoglu, A; (...); Ungan, F

Apr 8 2021 | EUROPEAN PHYSICAL JOURNAL PLUS 136 (4)

In this present work, for different impurity position and ionized doping concentrations, we have theoretically investigated the linear, third-order nonlinear, and total optical absorption coefficients corresponding t ... Show more

12 Effect of intense laser and electric fields on nonlinear optical properties of cylindrical quantum dot with Morse potential

Ungan, F; Bahar, MK; (...); Laroze, D

Jun 2021 | Mar 2021 (Early Access) | OPTIK 236

Enriched Cited References

In this study, the influence of the external electric field on the nonlinear optical properties of a laser dressed cylindrical quantum dot with axial Morse potential are theoretically investigated using the total optical absorpti ... Show more

13 Optical properties of a triple AlGaAs/GaAs quantum well purported for quantum cascade laser active region

Bahar, MK; Rodriguez-Magdaleno, KA; (...); Ungan, F

Mar 2021 | MATERIALS TODAY COMMUNICATIONS 26

Enriched Cited References

A theoretical investigation on the conduction electron states in a triple inverse parabolic AlGaAs/GaAs quantum well, designed in the spirit of the active region for a quantum cascade laser, is performed. The study includ ... Show more
